

# Where to Find Gresham's Rain Gardens

# Visit Gresham's Rain Gardens

We invite you to visit our demonstration rain gardens at the following locations. All of these gardens were built by City of Gresham staff and Americorps volunteers from Northwest Service Academy.

## 410 N Main Street, History Museum ▼

Historic downtown Gresham, at back of building next to the parking lot

- 2100 sf of roof area diverted
- built in 2007

## 505 SW Birdsedale Avenue, Hollydale Elementary School

*It is easiest to view these two projects after the school day or on the weekend. If you visit during the school day, please check in at the main office and get a visitors badge.*

### Adjacent to the playground at the SW side of the school

- more than 5000 sf of runoff area diverted
- built in 2009 by with help from Hollydale Elementary 2nd grade class
- supported by funds from EMSWCD and grants from DEQ and Metro ▼

### In the fenced-in area in the back (W side) of the school

- more than 900 sf of roof area diverted first into 2500 gallon cistern powered by bike pump to irrigate school vegetable gardens, then to a rain garden
- built in 2009 with help from the 4th and 5th grade Nature Leaders
- supported by grants from DEQ and Metro

## 18630 SE Division Street, ▲ Covenant Presbyterian Church

Near the parking lot on the SW side of the building

- 1000 sf of roof area diverted
- built in 2009
- supported by funds from East Multnomah Soil & Water Conservation District (EMSWCD) and grants from Oregon Department of Environmental Quality (DEQ) and Metro

## 502 SW Lillyben Avenue, private residence ▲

In the front yard – since this is a private residence, please view the garden from the side walk

- more than 500 sf of roof area diverted
- built in 2009 with help from the homeowners
- supported by funds from EMSWCD and grants from DEQ and Metro
